

Vernon Denix

Denim Project

Venom

Venom is a Marvel super villain character born from a race of beings called symbiotes from planet Klyntar. Originally ~~the symbiotes intentions were to create a peace keeping society through transforming worthy hosts into noble warriors.~~ In order to thrive, the symbiotes ~~attack~~ attach to a host, enhancing their physical abilities.

(parasite)

concept

Symbiotes are fully aware sentient creatures. So they're immediately affected by the host's intentions. If corrupted, they turn vicious, wild & violent.

Thus how venom was created through corrupted intentions of the ^{host} first host. And enhancing whatever feelings ~~that~~ are felt in that moment. Venom's rage worsened as he moved from host to host. He became arrogant, scornful, & sadistic

Venom's physical ~~strengths~~

superhuman Strength

Durability

Stamina

Regenerative healing factor

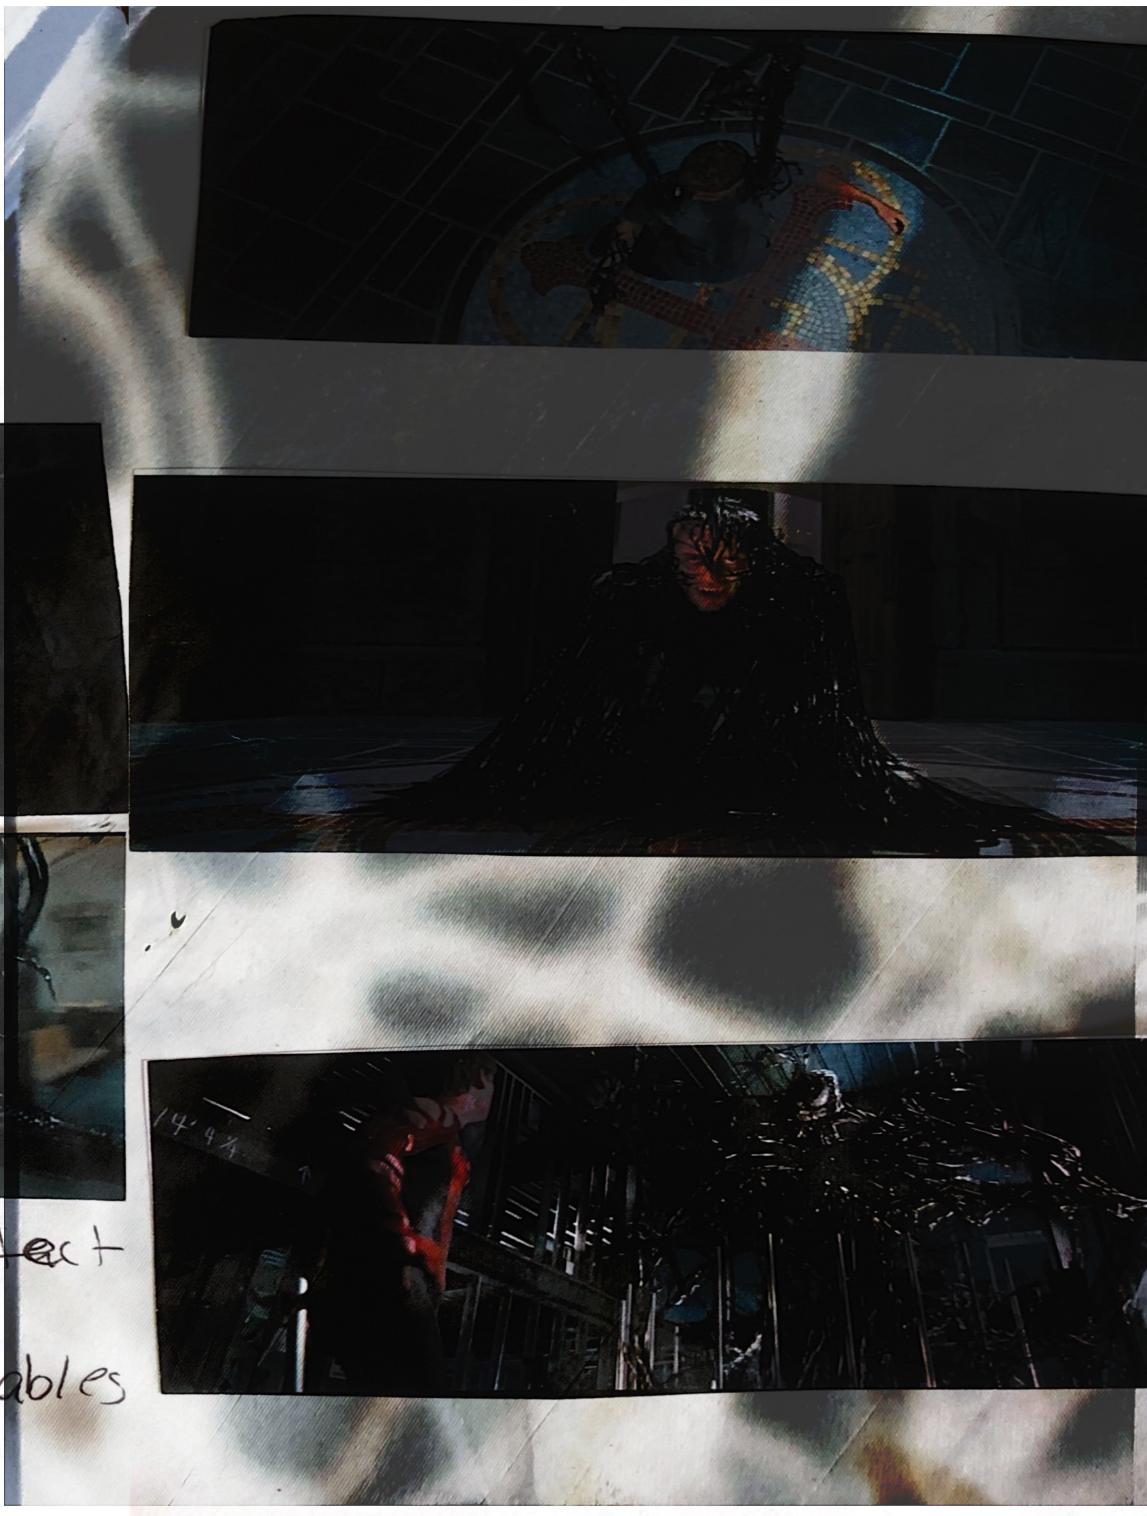

Genetic memory

Wall-crawling

Matter manipulation

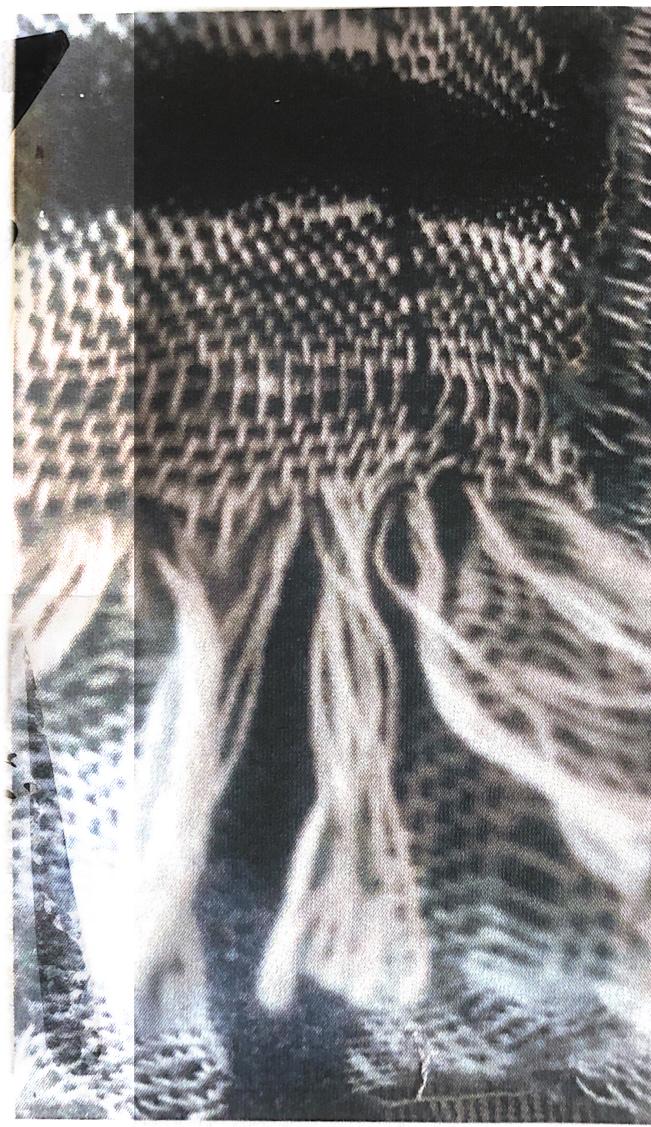

- venom's web is composed of tough flexible fibers.
spider-web, tar, squidink.
- strong, sticky

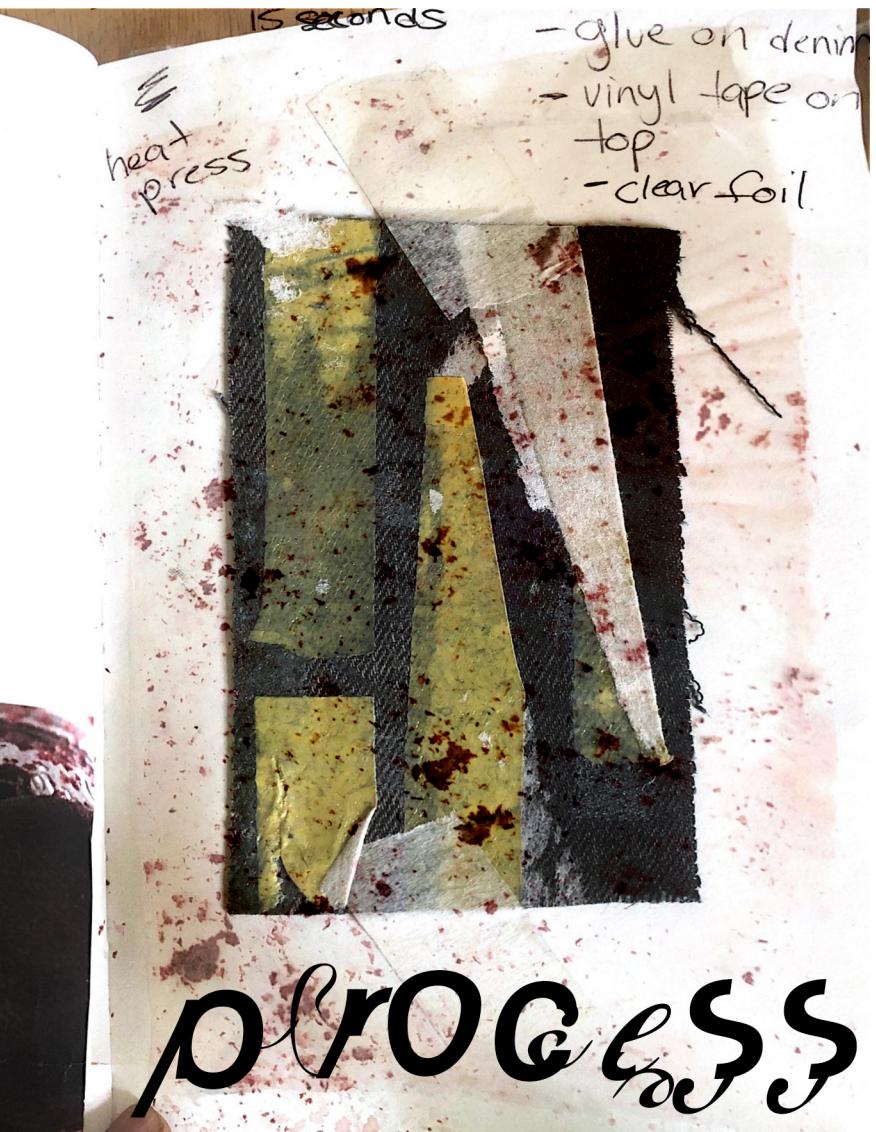

- spider ~~senses~~ senses - Able to detect danger.
- The strength of venom, enables its host to lift up to 70 tons past regular size.

Dying with Beets

Why Venom!

Denim?

To me, when I think of denim, the words natural and organic come to mind. Denim has a natural essence to it.

I think of the human body and its natural functions.

Venom is a parasite seeking ~~for~~ for a host. Venom will engulf the human body completely and manipulate its natural functions.

This is common for denim because I feel it's the most manipulated fabric we use in clothing. Using different chemicals to manipulate the weight, look, & feel of denim just like what venom does to the body.
